

Specialists in Metal Finishing
and Electroplating

The total metal finishing business to the manufacturing industry - from anodising to zinc plating.

Collins Chemical Blacking is a friendly family run business based in Surrey and serving London and the South East.

Established in 1966 solely carrying out chemical blacking, we have over the years expanded into many different metal finishes.

We also offer a total metal finishing business to the manufacturing industry - from anodising to zinc plating.
